**February 2024 – December 2024**

- Assisted in teaching Computer Programming 1 & 2 for 96 students, covering C++, Java, Python, and Python OOP.
- Provided hands-on guidance in coding exercises and basic programming.
- Graded assignments and provided feedback to enhance students' understanding.
- Collaborated with faculty members to develop engaging course materials and practical coding sessions.

**Technical Officer**, Digi-X Universitas Padjadjaran, Sumedang

**May 2023 – November 2023**

- Managed OBS and Zoom to ensure seamless virtual event execution.
- Resolved technical issues promptly to maintain a smooth user experience.
- Optimized event streaming using OBS for layout management and Zoom for real-time interaction.

## EDUCATION

---

**Universitas Padjadjaran**, Faculty of Economics and Business

**(Expected 2026)**

Bachelor of Digital Business

Cumulative GPA: 3.89/4.0

## PROJECTS

---

**Maxy Academy Hackathon**

**April 2025**

CV Builder & Scorer Web App

- Developed a web-based CV Builder using Laravel and Breeze for authentication and layout templates.
- Integrated Gemini AI API to evaluate and score CVs based on role-specific criteria.
- Utilized MySQL for data storage and database management.

### **Sales Performance Analysis & Dashboard for Tokopedia Auto Parts Store**

**May 2024 – June 2024**

- Analyzed sales performance and created a sales performance dashboard.
- Collected and cleaned sales data for analysis using Excel.
- Performed analysis to identify actionable insights from the dataset.
- Designed and developed a dashboard in Tableau to visualize the gathered insights and key performance indicators.

### **Retail Store Sales Performance Analysis**

**November 2023 – December 2023**

- Analyzed sales performance and developed insights for a retail store dataset using KNIME.
- Cleaned sales data for analysis using KNIME.
- Performed analysis to identify actionable insights from the dataset.
- Designed a presentation in PowerPoint to visualize and communicate the gathered insights.
